

XylPhi-PD®

Bactericide for use in grapevines.

- The proven treatment and prevention for symptoms of Pierce's Disease.
- Alternative to costly roguing and replacement of grapevines.
- Maintains production, efficiency, and uniformity in the block.
- Flexible application timing with durable injection system.

FREE Xyleject™ injector!

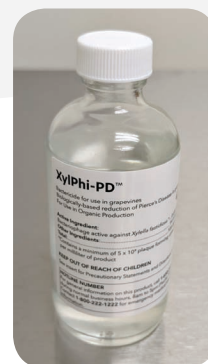

A Xyleject™ injector lease will be provided **free-of-charge** to grower for the 2025 season.

Grower:

- ✓ Purchase at least 10 units of XylPhi-PD® as usual, via preferred retailer/dealer.
- ✓ Submit the approval form (see reverse side) to A&P Inphatec, Tcollins@inphatec.com.
- ✓ Receive confirmation of lease program approval.
- ✓ Sign the lease agreement for Xyleject™ with Pulse Biotech for the 2025 crop season (<http://www.pulse-nfs.com/plants/>).
- ✓ Certified Applicator Training will be provided to the grower by Pulse. Day 1 product support assistance will be provided by A&P Inphatec, upon request.

- ✓ A scan/image of the filled-out lease application form (below) must be returned to A&P Inphatec.
- ✓ A scan/image of the **customer invoice** must be included with application form.
- ✓ Email form and invoice to: **Tcollins@inphatec.com**
